

## DESCRIPTION

The SWAL224E(R) is a simple, functional combination lock. It features a 4 dial locking system and a key override to eliminate the risk of forgetting codes. An interior switch allows for tool free changing of user codes meaning a user can update their code at any time without additional assistance.

## FEATURES

### Combination Padlock with Master Key Override

- 4 Dial Combination Lock with 10,000 possible user combinations
- Master key override – master key ordered separately
- Code discovery using master key
- User changeable code – tool free
- ABS plastic body
- Colour: black
- Vertical (V) and Left Hand (L) options available if required.
