

STATEWIDE FILING CABINETS - 455MM AND 610MM DEEP

Product Description

The Statewide Vertical Filing Cabinet is an Australian made product constructed of Bluescope steel. Our key lockable cabinets boast a single piece body made of wrap around steel, giving the greatest level of strength and durability available in a filing cabinet unit. Our Anti Tilt Locking system ensures that two drawers can't be opened simultaneously, reducing the risk of toppling. With two depth options available (455mm or 610mm), 4 different style fronts, 14 powder coat colour choices and even the option to have digital locking, you are sure to find the right filing cabinet to suit your office.

Benefits

Buying Statewide supports the Australian economy
Sourced locally and constructed with as few cuts as possible
Statewide cabinets will last as long as your office does.
Extra strength body holds its shape well and highly durable.
Ready to use the minute it is delivered
With one drawer open, the other drawers auto-lock!
Allows full access to the interior, and are remarkably durable
Style the front to suit your office
455mm or 610mm deep
Label your file drawers (not available on Streamline Front)
Add style by having different drawer/body colours
