Introducing BioCote®
Antimicrobial powder
coating for lockers,
cabinets and cupboards.

- ✓ 99.9% Reduction of *E. coli* and MRSA super bug.
- ✓ Independently tested.
- ✓ Effective for the life of the coating.
- ✓ Reduces the risk of cross contamination.

Statewide manufactures and supplies hospitals, gyms, healthcare facilities and more with strong, stylish, Australian-made steel storage lockers & products, backed with a lifetime warranty. All our products are fully welded to ensure the highest level of strength and durability. Now available with BioCote® antimicrobial protection built right into the powder coat, even the most stringent hygiene requirements can be adhered to.

BioCote® Antimicrobial Technology

- BioCote® antimicrobial technology is manufactured into locker powder coat to create a surface upon which bacteria/microbes cannot survive.
- BioCote® antimicrobial technology has been proven to have a broad spectrum effect against a wide range of microbes, including bacteria, mould and even some viruses.
- BioCote® is the only antimicrobial technology certified by HACCP international.
- BioCote® has been empirically proven to not leach or wash out from powder coat and will last for the lifetime of the powder coat.

* Available in White only. Other colours P.O.A. ** BioCote® is a registered trademark of BioCote Limited.

Top Five Microbial Facts

- 1 Microbes cause all infectious disease: 1 in 4 deaths globally.
- 2 Bacteria such as MRSA and *E. coli* can survive on hard surfaces for many months, presenting a significant opportunity for cross contamination.
- 3 Microbes such as mould are able to extract nutrients from materials, compromising their performance properties and causing early product failure.
- 4 BioCote® treated materials have been proven to deactivate both enveloped and non-enveloped viruses.
- 5 BioCote® Antimicrobial Technology has been proven effective against many microbes including: *Staphylococcus aureus*, *E. coli*, *Salmonella*, *Listeria*, *Legionella*, *Campylobacter*, *Pseudomonas*, *Shigella*, H1N1 virus, *Aspergillus Niger*.
