Galvanised Metal Construction

All of our products are manufactured from zinc galvanized metal to ensure durability and a quality finish, particularly necessary in clothes lockers when used under wet or steamy conditions.

Ventilated Doors

Sufficient venting in every door to allow for fresh air to circulate.

Powdercoat Paint

A quality powdercoat paint is electrostatically applied and then baked to the galvanized metal surface to again improve the durability and finish.

Locking System

A variety of locking methods are available with barrel / key or padlock operation.

Strength

Lockers can encounter harsh treatment but with:

- A one piece wrap around body on each locker.
- Door stiffener on single and two door lockers.
- Welded body construction.
- Robust internally fitted door hinging.

You can expect a lifetime of use.

Banking

For ease of installation or to increase stability and rigidity, lockers can be banked 2 or 3 wide in any configuration of door options.

Three Point Locking

Single door lockers have 3 point locking for maximum security.

Colour Range

Choose from a large selection in the Statewide standard range of colours.
