

DESCRIPTION

The Statewide Personnel Locker was developed in conjunction with the Australian Defence Force. It's manufactured in Australia using .7mm Bluescope steel in order to guarantee strength and durability. The locker features a hat shelf, boot shelf, hanging rail and 2 coat hooks. The locking system is 3-point key locking and is supplied mastered as standard. However, it can be supplied non-mastered on request for added security. Perforations are on all 4 corners of the door to ensure optimal aeration. The extra width of 495mm ensures more than enough space for clothing, equipment and other items.

An optional internal locking box can replace the hat shelf space, providing secure storage for personal items or restricted items such as pepper spray and handcuffs.

FEATURES

OPTIONS
